

OPRC Model Training Course – Introductory Level

Who Should Attend

All those involved in or who may have responsibilities for marine, port and handling facility operations that may potentially lead to a release of oil in the marine environment.

About the Course

The OPRC Model Training Course - Introductory Level is developed in line with the guidance issued by the International Maritime Organization (IMO), and are tailored to meet the needs of stakeholders of Singapore's maritime, oil and petrochemical industry.

The contents of the course are geared towards the local context, and relevant to the contingency plan and responsibilities of the participants.

Our instructors take into consideration the local response limitations, and the types of resources and supports available to respond to an oil spill effectively. This includes knowledge of the local area's environmental and economic sensitivities and the appropriate response strategies for them.

Providing a general introduction and awareness to oil spill response preparedness and response in the marine environment

Learning Outcome

- Introduce participants to the subject of oil spill response, to understand the fate and behaviour of oil when released into the marine environment and to consider the impact of oil spills;
- Introduce participants to the work being carried out by the international community to reduce or prevent oil spills from occurring; and
- Introduce participants to the range of oil spill response options and techniques that are available to the response managers and responders, in addition to the common challenges that may be faced during a response operation.

OPRC Model Training Course – Introductory Level

Topics to be Covered

- Fate and Behavior of Oil in the Marine and Shoreline Environment;
- Impact of Oil Spills;
- International and Local Legislations;
- Oil Spill Response Preparedness;
- Overview of Oil Spill Response Techniques; and
- Relevant videos and oil spill incidents case study.

About Us

We provide emergency preparedness and crisis management services to organizations.

Our mission is to create innovative and cost-effective solutions that allow our clients to control the outcome of events by controlling the risks and consequences.

Our personnel have more than 70 years of experience in oil spill, HNS and emergency response, local regulatory requirements and training expertise.

We also provide in full, or in part, the following services:-

- Review terminal's oil/HNS pollution emergency plan;
- Conduct site assessments and provide recommendations for the pollution response lay-out plan and workflow; and
- Conduct oil/HNS pollution table top exercise (TTX) and ground deployment exercise (GDX).

Course Director / Instructor

Capt Chan Heng Lum, Partner and Trainer, EmerPlan LLP – Before co-founding EmerPlan LLP, he was with the former Port of Singapore Authority (PSA) and the Maritime and Port Authority of Singapore (MPA) for more than 35 years, with wide responsibilities in areas including port marine projects development, regulatory formulations, technical auditing, contingency planning, training and international engagement.

A Master Mariner, he also holds a Master of Science (UK) from University of Nottingham. He is an adjunct lecturer in the Maritime Studies Program at the Nanyang Technological University.

Instructor

Rahman Bin Kamin, Partner and Trainer, EmerPlan LLP – He is a trained oil spills cleaning up trainer. Has had more than 35 years of emergency response and preparedness responsibilities working in the former Port of Singapore Authority (PSA) and Maritime and Port Authority of Singapore (MPA).

His field experience in oil spill response included various roles in the MPA's combat team that responded to the Evoikos oil spill in 1997, the Natuna Sea oil spill in 2000, and the Bunga Kelana 3 oil spill in 2010.

He had been in the exercise planning team, since 2002 to 2014, which organized the oil and chemical spill exercises that MPA conducted annually.
